A Little Bit About Yourself

I'm Denise, I'm 22 years old and I'm in my final year at W.I.T where I study Retail Management. My course ties in with work too as I've worked in fashion retail for 6 years now, for some beautiful boutiques and high street brands. Right now I'm in New Look where I work as a visual merchandiser. On Holy Chic I share trends that I've merchandised or new arrivals that my followers will love. I love that I have the ability to be creative everyday and that I can give ladies styling advice; seeing their face light up when we've created a look they love is just the best feeling!

Why did you start Blogging?

I had always shared my own style on Instagram and people would often suggest that I start a blog. After thinking about it for years, I finally made the plunge in 2015. Fashion is my passion and I write about how to embrace trends, give styling advice and I share my own looks. I write about beauty and lifestyle but I'm no make up artist, so readers enjoy my reviews of products because they come from a regular girls perspective. Writing is something I love so I enjoy creating comprehensive posts & I've enjoy meeting new people through Holy Chic.

Your Best Beauty Tip

It's only something that I've realised the importance of in the last couple of years but skincare is absolutely number 1. A good skincare routine is the foundation for great make up and tan, they both look so much better with a good, healthy base. Skincare isn't just about products either - healthy skin comes from within so look at what you're putting into your body to find the answer to some skin issues. And always, always, always take off your make up before bed, no matter how tired you are!

Your Top Tan Tip

Aside from looking after your skin, exfoliating before applying tan is a must, as well as moisturising regularly to ensure an even fade. A little tip that I have for avoiding that dodgy tan on your hands with a developing tan, (we've all been there!!) is to apply it with a brush and then rub your hands with a moisturiser one hour into developing. The rest of your tan continues to develop beautifully and you're not left with tangoed hands!
